PHYSICIANS**

THE FIRST CONNECTED MEDICAL OFFICE

Dr. Franck BAUDINO

Emergency Physician,
Chairman
& Founder of H4D

At H4D our mission is to improve access to care by enabling patients to consult a physician remotely through our Consult Station®, the first connected medical office.

This Class IIa Medical Device provides three key elements of a professional medical practice : preserving the unique doctor-patient relationship (i.e., the patient is not assisted by a third-party), providing reliable measurements (i.e., the right sensors, properly placed) and providing access to the service from a fixed and easily identifiable point of care.

H4D is a global company with a presence in the US, Europe and the Middle East. The Consult Station® is used in primary care, occupational health, and low acuity urgent care and is designed to be both a standalone point of care or to be integrated in an existing multi-modal care delivery system.

Length : 75 inches
Width : 48 inches
Height : 90 inches
Weight : 628 lb

TWO WAYS TO USE THE CONSULT STATION®

1

CLINICAL TELECONSULTATION

The primary care physician, specialist or workplace physician/nurse to guides the patient using videoconference to take their vital signs and perform any medical examinations deemed necessary.

At the end of the remote visit, the physician can deliver a prescription or refer to a specialist as needed.

2

SELF-PERFORMED CHECKUPS

A user-friendly video tutorial guides the patient through taking vital signs and self-performed tests.

A report with the vital signs is printed directly in the booth and can be sent to the referring physician.

A MEDICAL DEVICE IN SUPPORT OF PROFESSIONAL MEDICAL PRACTICE

The Consult Station[®], along with all its sensors, software bundle and APIs, is CE-certified and a FDA approved Medical Device. The device includes measuring instruments, professional sensors, screens and a communication system for capturing and sharing reliable, reproducible health data. The thoroughness of the medical approach and quality of the device means physicians can conduct a clinical examination and make a medical diagnosis just as they would in their own office.

	CLINICAL TELECONSULTATION	SELF-PERFORMED CHECKUPS

A UNIQUE USER EXPERIENCE IN SUPPORT OF PATIENTS AND PHYSICIANS

PATIENT

QUICK, SIMPLE STEPS

- Appointment made via secure website or application
- Appointment confirmation and reminder by email or text
- Patient check-in inside the booth

INTUITIVE AND COLLABORATIVE

- Secure patient identification and confidential consultation environment
- Video conference teleconsultation with clinical exam (dialog and treatment)

A COMPLETE SOLUTION

- Access to the health data in the digital patient file on the website or app
- Prescriptions and reports can also be printed on-site.

PROVIDER

- Proprietary physician software used to perform remote consultations and chart patient results
- Full medical coordination with intuitive appointment scheduling services
- Seamless integration with existing EMRs

- Certified, patented medical device supporting best medical practices
- Videoconferencing with clinical exam
- Library of remote examination protocols

- Access to patient file
- Report to referring physician
- Secure data storage
- Interface with third-party software

YOUR PARTNERS FOR A SUCCESSFUL LAUNCH AND INTEGRATION

H4D takes a rigorously project-based approach to healthcare, including medical access, technological solutions and project production management.

MEDICAL EXPERTISE

1

COMPLETE MEDICAL SERVICE

Access to medical professionals, training, sharing of best practices in clinical telemedicine and medical coordination.

PROJECT EXPERTISE

2

PRODUCTION OF HEALTHCARE PROJECTS

Complete project management including a pre-installation study, defining the current healthcare resources, training all existing providers, and facilitating patient/employee engagement and education.

TECHNOLOGY EXPERTISE

3

COMPLETE MANAGEMENT OF THE TECHNOLOGICAL ECOSYSTEM

In-house development team can facilitate integrations of the Consult Station®, Consult Access® physician software, patient appointment application and health data hosting.

Their employees use the Consult Station® today

A FULL LINE OF SERVICES BASED ON THE CONSULT STATION®

H4D works diligently with each client to co-build specific services into each healthcare project.

H4D offers a primary care service that enables patients to make appointments with a primary care physician or a specialist.

The physician conducts a true clinical examination remotely to make a diagnosis and if necessary, write a prescription printed in the booth that can be taken immediately to the pharmacy.

Patients can confer with their doctor in total privacy, very much as they can when sitting in a doctor's office.

Teleconsultation with
a primary care physician

Teleconsultation with
a specialist

H4D provides consulting to workplace health professionals. Workplace physicians and nurses can incorporate the Consult Station® in their protocols for monitoring employees. They save time and can track a greater number of employees without affecting their quality of care.

To meet employee healthcare regulatory requirements, H4D also offers employers a nursing service, providing an H4D nurse on site.

Routine physicals, return-to-work
clearances and more.

Workplace
nursing service

PERIODIC CHECKUPS

H4D makes possible periodic checkups, tailored to each patient. Performed right on-site, this preventive medicine service allows patients to take stock of their health with personalized supplemental exams so they can detect potential illnesses or at-risk conditions before they get worse.

Prescription of
additional exams

Screening for at-risk
behaviors and referrals

PREVENTION PROGRAMS

H4D has developed customized prevention programs on such topics as sleep, stress, addictions, nutrition and inactivity/exercise. Physicians work with patients individually to raise their awareness, help them change their behaviors and maintain wellness over the long term.

Wellness education
and personalized advice

Screening for at-risk
behaviors and referrals

A REAL RESPONSE TO NEEDS EXPRESSED AT THE LOCAL, REGIONAL AND NATIONAL LEVELS

BUSINESSES & EMPLOYERS

Occupational health & Quality of Work Life (QWL)

- Improving employer brand image ;
- Attraction and retention of employees ;
- Positive economic impact derived from reducing absenteeism/presenteeism ;
- Improved management of workplace healthcare.

PUBLIC AND GOVERNMENT INSTITUTIONS

Access to care in rural or underserved areas & government employee occupational health

- Greater local medical coverage ;
- Unburdening of emergency rooms ;
- Decongestion of care networks ;
- Improved management of workplace healthcare.

PHARMACIES

Innovative community services

- Greater local medical coverage ;
- Creation of point of care clinics in pharmacies ;
- Increasing physician-pharmacist partnerships ;
- Increasing access for medical advice and prevention.

HEALTH CARE FACILITIES

Optimization of medical resources

- Decongesting waiting lines in health care facilities & reducing health workforce costs ;
- Enabling collection and analytics of standardized and reproducible medical data ;
- Enabling specialist consultations from one-hospital to another, saving time on transportation for patients and physicians.

UNDERSERVED URBAN & RURAL AREAS

Boosting local access to healthcare and social inclusion

- Renewed access to care ;
- Increasing prevention, thereby reducing long-term healthcare complications and costs ;

SMART CITIES

Citizens' quality of life

- Pioneering technological initiative for residents ;
- Making healthcare accessible at the right place and at the right time to all citizens ;
- Creating an effective healthcare network ;
- Early warning system for epidemiological analyses.

CORRECTIONAL FACILITIES

Access to care for inmates and workplace care for staff

SENIOR LIVING FACILITIES

Assistance to seniors

CAMPUSES & STUDENT DORMITORIES

Students' access to care
