

TELEMEDICINE FOR LOCAL AUTHORITIES

**ACCESS TO
HEALTHCARE
FOR ALL**

A MEDICAL AND TECHNOLOGICAL RESPONSE TO HEALTHCARE SHORTAGES

In the European Union, 13,5% of the health need isn't covered due to a lack of medical resources. Across the United States 7.200 regions are designated as Health Professional Shortage Areas. If rural areas are most impacted, citizens in certain metropolitan areas also struggle to access quality healthcare and prevention services. H4D meets this demand by giving local authorities access to telemedicine services.

NEEDS

- Lack of access to medical prevention services:
>> Underserved communities
- Difficulties with replacing doctors in areas of low population density:
>> Insufficient medical resources to cover healthcare need
- Ageing populations:
>> Predictable increase in demand for healthcare
- Patients forgoing healthcare:
>> Worsening health following illness

RESPONSES

- **Prevention programs designed by doctors**
- **Renewed access to healthcare**
- **Strengthened local medical resources**
- **Timely treatment of infections**

French-based expertise for a reliable and patient-centric medical service

PATIENT-CENTRIC

- Welcome by a booth attendant who explains the service and applies strict sanitation protocol to the booth
- Access to doctors who are trained in clinical telemedicine

RELIABLE

- Controlled and certified medical environment

A COMPREHENSIVE MEDICAL SERVICE FOR PATIENTS AND LOCAL COMMUNITIES

PRIMARY CARE

- Remote consultations with primary and specialist practitioners
- Streamlined patient pathways
- Decongested health systems

PREVENTION

- Autonomous and assisted checkups
- Prevention programs tailored to the needs of the local community: smoking, exercise, nutrition...

OCCUPATIONAL HEALTH

- Access to quality healthcare at the workplace
- Increased wellbeing and performance
- Tailored prevention programs and self-checkups

H4D'S EXPERTISE AND PHILOSOPHY

Dr. Franck BAUDINO

GP, President &
Founder of H4D

H4D was founded over ten years ago to make healthcare accessible to everyone.

With the Consult Station® and its intuitive software, H4D meets the healthcare needs of citizens, makes life easier for doctors and strengthens local medical resources.

H4D's telemedicine booth is an integral part of local telemedicine projects. It supports the aims of regional health authorities and professional medical groups.

Three areas of expertise that make your telemedicine projects a success

BUILDING LOCAL HEALTH PROJECTS

TRAINING HEALTH PROFESSIONALS FROM LOCAL COMMUNITIES

DEPLOYMENT, LAUNCH AND CONTINUOUS ACTIVITY MONITORING
